cell part
cell
organelle
protein-containing complex
organelle part
synapse part
synapse
extracellular region
extracellular region part
membrane-enclosed lumen
membrane
membrane part
cell junction
catalytic activity
molecular transducer activity
binding
molecular function regulator
transporter activity
antioxidant activity
transcription regulator activity
structural molecule activity
response to stimulus
metabolic process
cellular process
developmental process
biological regulation
multicellular organismal process
regulation of biological process
negative regulation of biological process
cellular component organization or biogenesis
localization
signaling
rhythmic process
multi-organism process
positive regulation of biological process
locomotion
biological adhesion
Cellular Component
Molecular Function
Biological Process
