

# Correction to “Enhancement of Neutral Lipid Productivity in the Microalga *Isochrysis Affinis Galbana* (T-Iso) by a Mutation-Selection Procedure”

Bougaran, G., Rouxel, C., Dubois, N., Kaas, R., Grouas, S., Lukomska, E., Le Coz, J.-R. & Cadoret, J.-P. (2012). Enhancement of neutral lipid productivity in the microalga *Isochrysis affinis Galbana* (T-Iso) by a mutation-selection procedure. *Biotechnol. Bioeng.*, 109, 2737–2745. <https://doi.org/10.1002/bit.24560>

In view of scientific advances on identification and nomenclature of microalgae strains, the name of the wild type strain used in the study is incorrect. From recent investigation it is found that the strain is different from CCAP927-14 and has to be renamed “Argenton IFREMER strain.” We apologize for the error.
