

Phase (°) and coherence with summer equatorial insolation

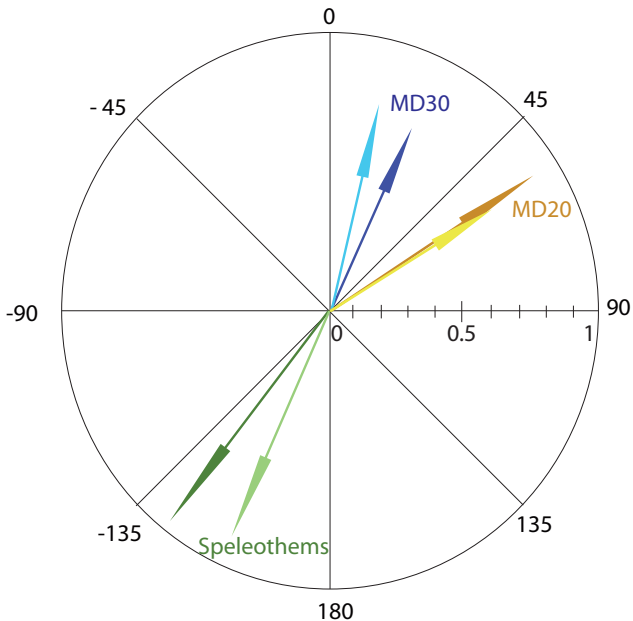

Figure S3. Coherence and phase angle (°) with daily insolation in June at the Equator of $\delta^{18}\text{O}$ of speleothems from China (green), MD05-2930 SST from *T. G. ruber sensu stricto* (blue) and of MD05-2920 SST (yellow). Dark shades correspond to the 23ka band and light shades to the 19ka band.
