Introduction

This document reports on the French oceanographic cruises conducted in 2015. It was drawn up by IFREMER, and more specifically by the SISMER (French acronym for Scientific information systems for the SEA) department which is in charge of managing the metadata and data produced by French research cruises.

It provides a detailed description of the role of the various players managing French ocean-going facilities and of the means to archive cruise information and oceanographic data. It presents the fleet's activity in 2015 and provides dynamic access to cruise information through the new research cruise catalogue: <http://campagnes.flotteoceanographique.fr/>.

The electronic version of this document is available at the following address:

<http://doi.org/10.13155/45362>.

Clicking on the hypertext links gives direct access to the cruise descriptions.

Previous years' reports for French oceanographic cruises are also available via the Archimer website IFREMER's institutional archive, at: <http://archimer.ifremer.fr/>.

SISMER thanks:

- ✓ the chief scientists of 2015 cruises,
- ✓ GENAVIR,
- ✓ Aurélie Feld, Sylvie Van Iseghem and Jean-Xavier Castrec (IFREMER/DMON),
- ✓ Yves Gouriou and Dominique lopes (IRD),
- ✓ Hélène Léau and Valérie Hadoux (IPEV),
- ✓ Malika Oudia and Pascal Morin (CNFC), and
- ✓ Viviane Bout-Roumazeilles (CNFH).

They have enabled us to collect information required for this report, in particular, and to contribute to increasing the value of the sea measurements effort.

1 Those involved

The main ocean research vessels are managed by the following organizations:

- **CNRS/INSU** (French national scientific research center / national institute for sciences of the universe),
- **IFREMER** (French research institute for exploitation of the sea),
- **IPEV** (French polar institute – Paul Emile Victor),
- **IRD** (Institute of research and development),
- **FRENCH NAVY/SHOM** (French Navy's hydrographic and oceanographic service).

The first 4 organizations are grouped together in a joint service unit, JSU FRENCH OCEANOGRAPHIC FLEET OR UMS-FOF, whose objective is the coordinated management of the French oceanographic fleet major research infrastructure (MRI) giving priority to serving the scientific community, in compliance with the specificities of its members, specifically based on the assessment of proposals for scientific and technological research cruises carried out by the national assessment committees (CNFH and CNFC).

The French scientific community also has access to other European vessels (United Kingdom, Germany, Spain, The Netherlands, Norway) through the OFEG (Ocean Facilities Exchange Group) which IFREMER belongs to.

Finally, SISMER ensures that the data related to these cruises are permanently stored.

1.1 FRENCH OCEANOGRAPHIC FLEET UMS JOINT SERVICE UNIT AND ASSESSMENT COMMISSIONS

Since 2008, the French sea-going facilities for oceanographic research from CNRS, IFREMER, IPEV and IRD have made up the French oceanographic fleet major research infrastructure (FOF MRI).

A significant step was made for integration of French ocean-going resources, under the aegis of the Ministry of Higher Education and Research, in March 2011, when the French oceanographic fleet joint service unit (UMS) - was created, initially for a 4-year period, then extended by two years.

The JSU's assigned objective is to improve the management of the French ocean research fleet, shared by the four operators up until then.

Setting up this Joint Service Unit with unified governance should give the public authorities an overarching view of this Major Research Infrastructure (MRI) in the framework of supervising public policies and clear the way for a comprehensive strategic vision which is currently lacking.

To meet this objective, **three missions** have been defined:

- develop integrated scheduling of vessels and large-scale equipment open to national calls for tender (offshore and inshore).
- ensure foresight, defining and coordinating the fleet development plan, taking into account the requirements of national public-sector operators who are not members of the JSU (i.e. TAAF, FRENCH NAVY),
- and coordinate investment policies.

On the JSU FLEET WEBSITE (<http://www.flotteoceanographique.fr/>) are descriptions and activity of all vessels and vehicles of all JSU members, cruise schedules and information about cruise applications and cruises conducted.

In deciding on the scheduling for seagoing facilities, the FLEET JSU steering committee relies, amongst other things, on the assessments of ocean research cruise proposals made by two national commissions following the national call for ocean-going and coastal cruises:

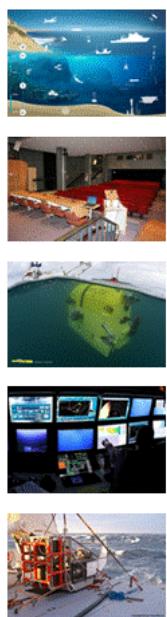

- the **National ocean-going fleet commission (CNFH)**, for cruise projects requiring ocean research vessels from the French offshore oceanographic fleet.
- the **National coastal fleet commission (CNFH)**, for cruise projects requiring ocean research vessels from the French inshore oceanographic fleet.

The role of these commissions is also to:

- assess, a posteriori, the results from coastal oceanographic cruises performed using French oceanographic resources; and
- respond to requests from the Scientific and strategic orientations committee (COSS) to take part in drawing up advice concerning the sea-going resources for oceanographic research.

The diagram below shows how the cruise process functions, from application to achievement.

The scheduling process

Steps of the process:

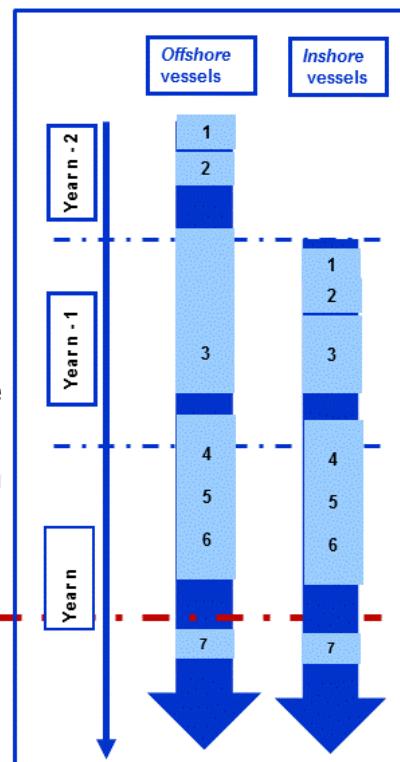

1. *Call for tender*
2. *Evaluation by CNFC – CNFH*

3. JSU fleet scheduling

If cruise is scheduled

4. Chief scientist informed about the various regulations
5. Request filed for studies in foreign waters
6. Preparation of the cruise
7. Cruise report

Cruise is conducted

1.2 SISMER

It has been proved that without permanent archiving, done following well established standards, 30% of data acquired is lost by the end of 10 years. The cost of using facilities for data acquisition at sea is so high that it is essential to implement the resources and means necessary for good data preservation.

SISMER is an IFREMER department located at its Brittany center. It is part of the IDM (marine information systems and data) unit of the IMN department of Marine and Digital Infrastructure.

It is France's national coordinator for international data exchanges in the framework of the "International Oceanographic Data and Information Exchange"(IODE)' programme of UNESCO's Intergovernmental Oceanographic Commission (IOC).

To meet the needs of the scientific community, it works with the ISI (Information systems engineering) service in the IDM (IT and marine data) department to develop and use marine-related information systems and databases. The service manages and archives the data collected during French oceanographic cruises and keeps an inventory of them. It also manages real-time data from various operational oceanographic systems (Coriolis database).

SISMER manages the French national oceanographic database, which under very specific rules protects, standardizes and disseminates, data from various fields of marine science, like hydrology, marine biochemistry, currentometry, gravimetry, magnetometry, seismics, bathymetry, acoustic imaging, physical-chemical seabed characteristics and the deep sea environment. The data can also come from French research laboratories taking part in surveys at sea.

Sismer archives the data, along with information about its source, the experimental conditions and collection methodology (metadata). It applies quality control in accordance with international standards and distributes the data and metadata using standardized formats.

It makes an active contribution to French, European and international working groups devoted to standardization and exchange of data. It coordinates the SeaDataNet pan-European marine data center network, whose aim is to link the main European oceanographic data centers and thus give users access on line to distributed databases through a single portal.

Data which is incorrectly or not archived will ultimately be lost for good.

Cruise data which is incorrectly referenced (CSR sheet incorrectly or not completed) cannot be accessed and are therefore ultimately lost.

The value, in both scientific and financial terms, of data acquired at sea represents a legacy which must be preserved.

2 Oceanographic cruises

2.1 DEFINITION

An "oceanographic cruise" is a set of days during which a vessel acquired observational data. This can be outings of one day (station vessels), several days (inshore vessels) or several weeks (offshore vessels).

"French cruise" means a cruise for which the home organization of the client (chief scientist) - or of the contracting authority - is French.

Any cruise classified « Confidential Defence » or considered as such is not listed in this document. Those cruises are taken into account for the historical report, but are not counted in the yearly report.

2.2 CRUISE LISTING

Taking inventory of cruises is done in several steps:

- Using the scheduled ocean cruise programs. This is done with the help of the people in charge of ship management;
- At the end of each cruise, the chief scientists are requested to send a description of their cruise to SISMER. The summary can be completed directly on line (<http://forms.ifremer.fr/sismer/csr/>).

A template (called a CSR – Cruise Summary Report sheet) is also available on the SISMER WEBSITE found here: http://www.ifremer.fr/sismer/FR/catal/campagne/Fiche_CSR_FR.htm or, for vessels of the JSU, in the [Compte-rendu de la campagne](#) report made available on the FLEET JSU website.

This action is carried out in compliance with the procedure followed aboard the vessels of the JSU (<http://www.flotteoceanographique.fr/Campagnes-scientifiques>) and with the "Vade-Mecum for inshore oceanographic vessels users' guide" (<http://cir.dt.insu.cnrs.fr/docfiches.html>) for INSU, IFREMER and IRD.

- The information thus gathered is then archived in the SISMER database. Each cruise is given a track number (single identifier).

A DOI (Digital Object Identifier) is also assigned to each non-confidential cruise performed aboard a vessel of the Fleet JSU and whose chief scientist is clearly identified.

These DOI enable the cruises to be reliably and lastingly cited in scientific publications. Their main objective is to describe the cruises as scientific experiments and highlight the French fleet.

2.3 CHIEF SCIENTISTS' RULES AND DUTIES

In keeping with the protocol in effect, once the chief scientist has been notified that the cruise has been scheduled, he or she must learn about a number of regulations and inform all the members of the scientific team who will embark about them. These texts especially deal with: the [rights and obligations in terms of archiving and disseminating data](#), acquired aboard vessels, and the [role the chief scientist is expected to play](#) on board the vessel.

The process for carrying out cruises, along with the protocols and related documents for [offshore](#) and [inshore](#) cruises can be accessed on the FLEET JSU website.

2.4 TRANSMISSION OF SUMMARIES

In the framework of the European SeaDataNet – pan-European Infrastructure for marine data programme (<http://www.seadatanet.org/>), these cruise summaries are sent to BSH/DOD (German data center) which ensures that the European CSR are disseminated worldwide, particularly to [CIESM/ICES](#) (International Council for Exploration of the Sea).

3 Access to cruises and data

The full inventory of *oceanographic cruises* in the French database and *their related data* contains information covering almost a century of measurements taken at sea.

It can be accessed at the following URL:

<http://campagnes.flotteoceanographique.fr/>

The screenshot shows the homepage of the French Oceanographic Cruises portal. At the top, there are search bars for "Search everywhere" and "Search cruise", along with a search icon. The main content area displays 8416 results. The first result is for the "MOOSE-GE 2016" cruise, which is described as follows:

MOOSE-GE 2016
Responsable(s) : COPPOLA Laurent
The main objective of the MOOSE project is to observe the long-term evolution of the Northwestern Mediterranean Sea in the context of the climate change and anthropogenic pressure (over 10 years) in order to be able to detect and identify long-term environmental trend and anomalies of the marine ecosystem. The annual cruise focuses on moorings maintenance and hydrology, biogeochemistry and biology monitoring of the Northwestern Mediterranean basin. It aims to follow variability of water masses properties [...]
19/05/2016 - 09/06/2016, L'Atalante, Mediterranean Sea, Western Basin, Golfe du Lion et Mer Ligure

The second result is for the "PELGAS 2016" cruise, described as follows:

PELGAS 2016
Responsable(s) : DORAY Mathieu, DUHAMEL Erwan, HURET Martin, PETITGAS Pierre
La série de campagne PELGAS répond à la nécessité d'évaluer l'abondance des petits pélagiques du golfe de Gascogne, afin d'assurer la durabilité de leur exploitation par la pêche. L'Europe cofinance la campagne PELGAS afin d'assurer la fourniture des indices d'abondances d'anchois et sardine aux groupes de travail internationaux chargés de l'évaluation de ces stocks. Le second objectif des campagnes PELGAS est de surveiller l'écosystème pélagique du golfe de Gascogne au printemps. Cette surveillance [...]
29/04/2016 - 02/06/2016, Thalassa, Bay of Biscay

The third result is for the "DYNAMOSEINE 2016" cruise, described as follows:

DYNAMOSEINE 2016
Responsable(s) : HUGUET Arnaud

On the left side of the page, there are filters for "YEAR" (2016, 2015, 2014, 2013, 2012, 2011, 2010, 2009) and "SHIP" (Alette, Albert Christine, Albert Lucas, Alcyon, Alidade, Alis, Almoravide, Amalthee). At the bottom left, there are buttons for "Reset facets" and "Reset research".

This portal provides cartographic and interactive consultation and search functions for cruise data. It also enables data to be retrieved or ordered on line, using the check-out and form to be completed on the server, in compliance with the degree of confidentiality.

French research cruises and their data are incorporated in the SeaDataNet project's European catalogues (<http://www.seadatanet.org/>). Information about the cruises can be found at: http://seadata.bsh.de/csr/retrieve/sdn2_index.html, and their data is on the SeaDataNet http://seadatanet.maris2.nl/v_cdi_v3/search.asp website.

The database which can be accessed from the international POGO server: <http://www.pogo-oceanresearch.org/> gives the scheduled cruises of research vessels over 60 m LOA for a dozen countries. SISMER sends it the planned cruise schedules for its largest vessels. These plans are also included in the EU Eurofleets 2 project.

Along with the cruise inventory, data from various fields of ocean research are also archived. They include marine physics, chemistry, biology, geology and geophysics, as well as exploratory fisheries and technology.

SISMER archives and disseminates part of the data collected aboard French research vessels - primarily those of FLEET JSU vessels - and observation systems.

The data are transmitted following one of the following patterns:

Sent directly to SISMER at the end of the mission:

- Raw data acquired using French facilities managed by IFREMER (major facilities),
- Single- and multi-beam bathymetric data,
- Gravimetry data,
- Magnetometry data
- Seismic reflection data,
- Sonar imaging data (sidescan sonars, multibeam echo sounders),
- Navigational data,
- Shipboard ADCP data from RV *L'Atalante*, *Thalassa*, *Le Suroît*, *Beautemps-Beaupré*, *Pourquoi Pas ?*,
- Data from underwater vehicles,
- Fisheries data.

Data requiring laboratory processing:

These data are transmitted once measurements have been validated or samples analyzed:

- Marine physical and biochemical data collected at hydrological stations (CTD and bottle casts);
- Eulerian or Lagrangian time series (currentometry, temperature, deep-sea tide gauges),
- Geological samples and analyses.

Data transmitted in real time:

When the ship is so equipped, data can be sent directly in real time for the needs of modeling experts in the framework of operational oceanographic projects:

- CTD and XBT from some cruises,

Data compilations:

SISMER manages and distributes archives of data and data compilation products: theme-based databases, digital terrain models (MNT), maps and atlases which are created in partnership with other scientific centers and laboratories, in the framework of French, European and international programs:

The Sextant portal (marine and coastal geographical data infrastructures) provides a catalogue of baseline reference data related to the marine environment: <http://sextant.ifremer.fr/fr/>

4 Cruises report

Each year, the cruise database is enriched with new data. Sometimes we also recover information about older cruises, particularly when a link to a bibliography or to data is requested.

4.1 BACKGROUND

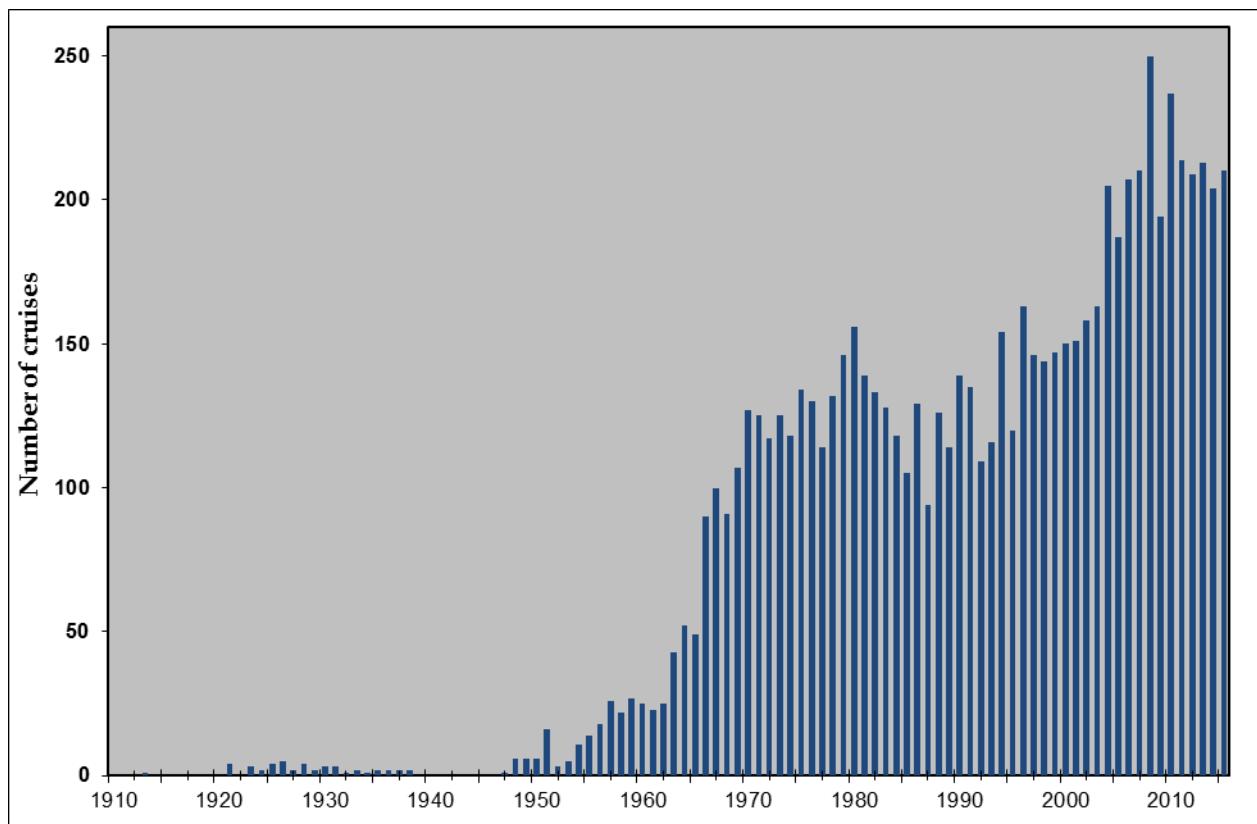

In all, SISMER has catalogued 7,911 French oceanographic cruises (broadly speaking, without any confidentiality criteria) since 1913, including:

- ✓ 6,761 cruises (strictly speaking),
- ✓ 704 simple or piggy-back transits,
- ✓ 337 sea-trial or shake-down cruises,
- ✓ 54 service provisions,
- ✓ 55 other cruises.

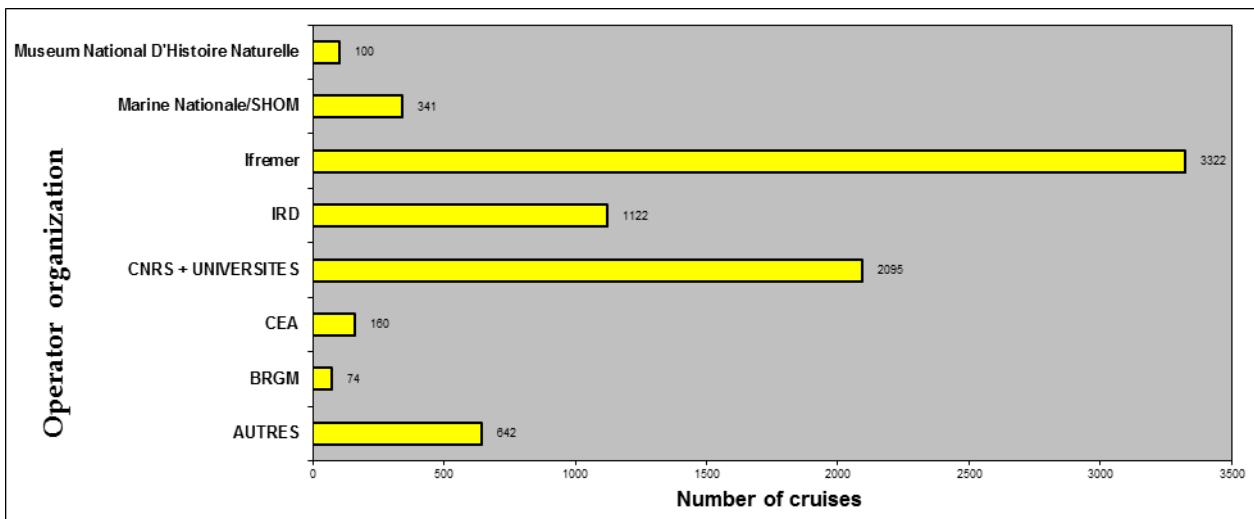

Only 7,856 cruises (not including these "other cruises") are covered in this report's statistics.

In the past, cruises were generally conducted by the former Scientific and technical fisheries institute (ISTPM) and by the French Navy's hydrographic and oceanographic service (FRENCH NAVY/SHOM). Later, other organizations like the CNRS, IRD (formerly ORSTOM), IPEV (formerly IFRTP), the National museum of natural history (MNHN), CNEXO (National center for exploitation of the oceans) and then IFREMER (created by merging ISTPM-CNEXO) greatly contributed to the efforts to collect measurements at sea, using their own facilities. Currently, the growing number of European projects and international programs for ship time sharing mean that a number of French cruises are made aboard foreign vessels.

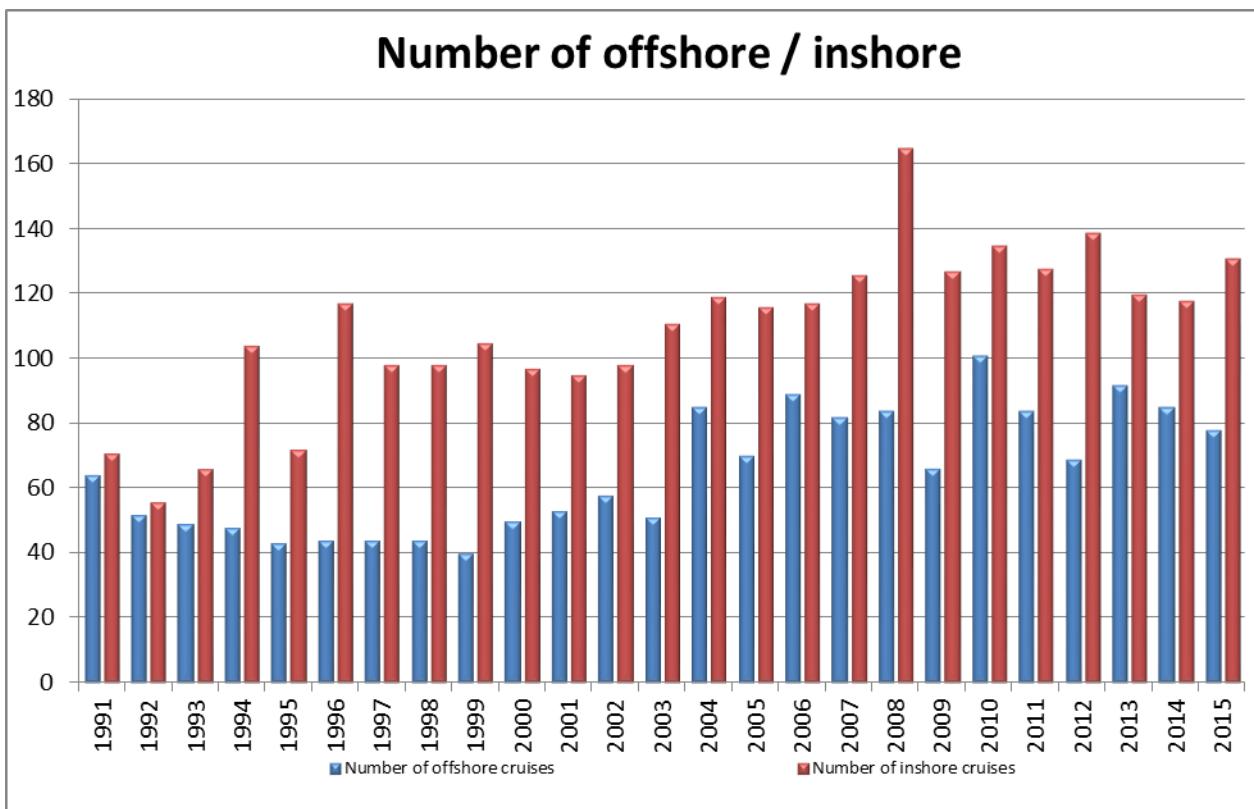

The 7,856 French cruises (including ocean research cruises, simple transit and piggyback missions, sea trial cruises and commercial service provision) can be broken down over time, since 1913, as follows:

The main client organizations (usually the organization which the chief scientist belongs to) for these cruises were:

The graph below shows trends for offshore (ship \geq 50 m LOA) and inshore (ship \leq 50 m LOA) cruises over the past 25 years.

The number of both ocean-going and inshore cruises has been growing over these 25 years. However, this seems to have stabilized over the past ten years or so at around 130 cruises per year for inshore vessels and those belonging to stations and 80 cruises per year for offshore vessels.

4.2 YEAR 2015

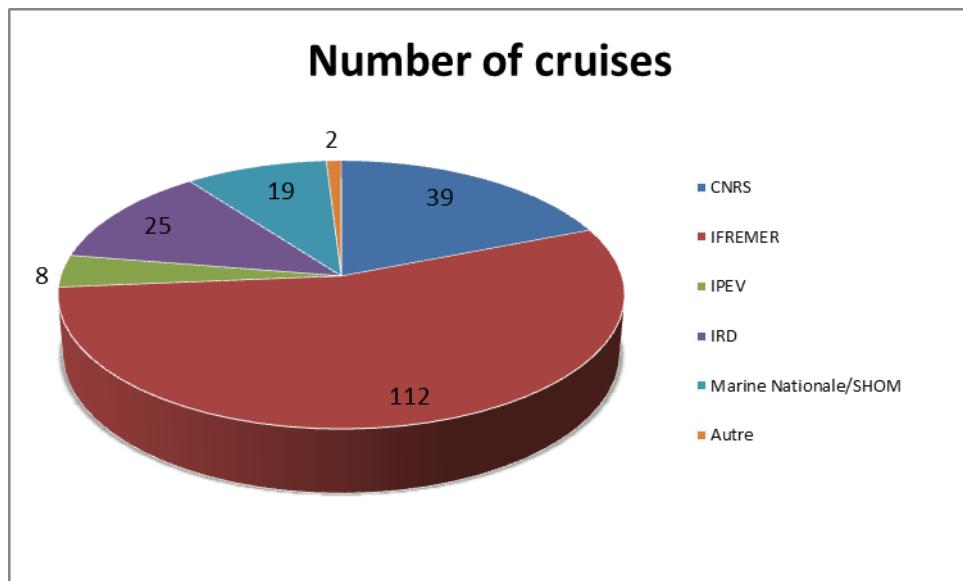

In 2015, 205 French cruises (oceanographic, trials, transits and commercial service performance, not classified as "Confidential") were recorded at SISMER for offshore and inshore vessels.

This is not entirely representative of the French fleet, since there were also cruises conducted on station vessels, but they have not been referenced at SISMER for the moment. However, the schedules for these vessels can be accessed on line:

<http://www.flotteoceanographique.fr/Calendriers-des-campagnes/Calendriers-navires-de-station>

4.2.1 Breakdown of cruises by managing organization

The managing organization is the shipowner.

4.2.2 Breakdown of cruises by client organization

The client organization is the contracting authority requesting the cruise (generally represented by the 1st chief scientist).

Chief scientist's organization	Number of cruises
BRGM	2
CEA	2
CNRS + UNIVERSITIES	56
Directorate for industry, mines and energy	1
IPEV	1
IRD	8
IFREMER	102
Institut Francais du Petrole	1
French Navy/SHOM	26
Ministry of ecology and sustainable development	3
National museum of natural history	1
Secretariat general of the Pacific community	2
TOTAL	205

As regards the chief scientists, the same main organizations are present each year. Other organizations appear on a more occasional basis.

4.3 CRUISES BY VESSEL

This report presents the activity of vessels in the French fleet as comprehensively as possible.

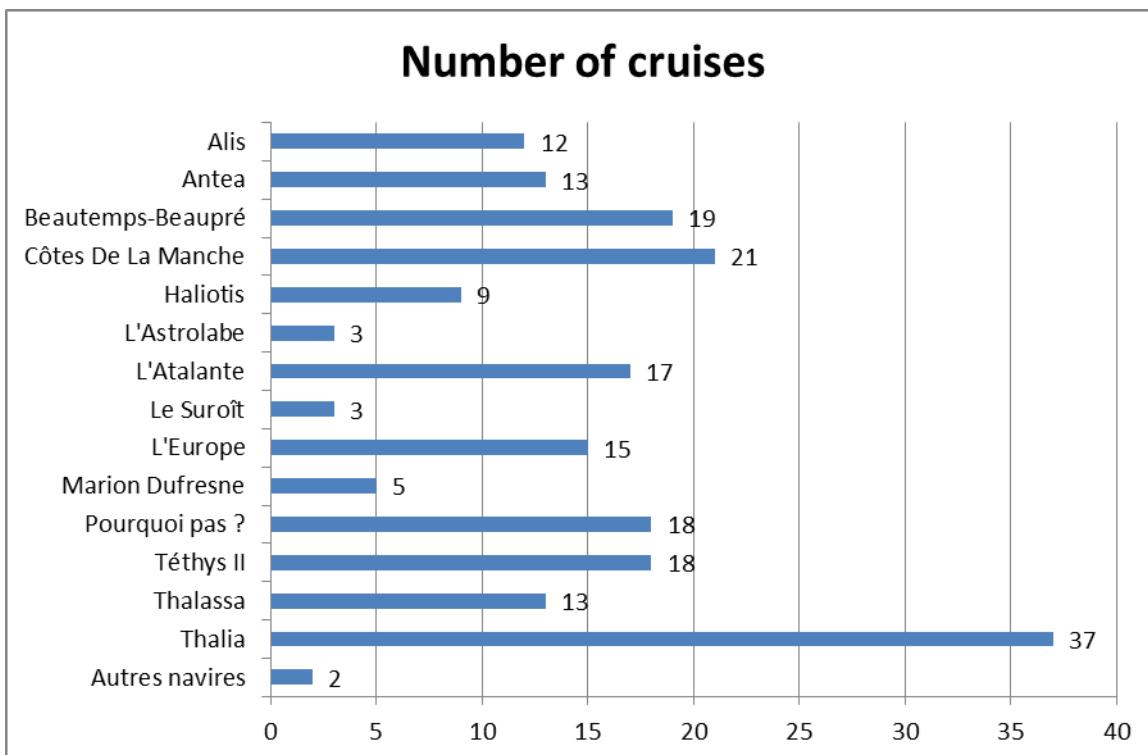

Some of the cruises have been referenced at SISMER, meaning that their chief scientist sent us their data at the end of the cruise by filling out the CSR sheet.

Training cruises are not referenced at SISMER, so they are listed in paragraph 4.3.2.

Steps are being taken to try and obtain the same outcome for station boats, but some time is still needed to achieve this.

4.3.1 Cruises referenced at SISMER

The 205 cruises from 2015 referenced at SISMER were carried out aboard 9 offshore ocean research vessels, 5 inshore oceanographic vessels, 2 station boats and 2 underwater vehicles (*NAUTILE* and *ROV VICTOR 6000*). The WEBSITE of the JSU <http://www.flotteoceanographique.fr/La-flotte/Navires> provides a detailed description of the fleet.

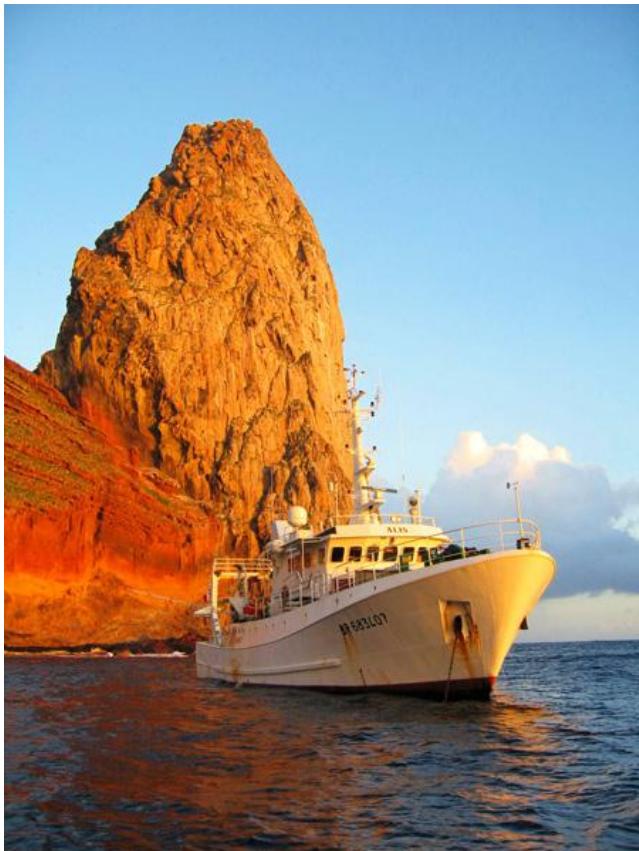

The 2015 cruises are presented below, listed by vessel and indicating spatial location and time period. A full list of cruises in alphabetical order and for all vessels is also provided at the end of the document.

4.3.1.1 Cruises by L'Alis

RV Alis is a 28.50 m trawler operating in the South-West Pacific Ocean from French Polynesia to Papua-New Guinea. The vessel is based in New Caledonia. It is operated by IRD.

It performs oceanographic missions for physics (umbilical cable, shipboard ADCP, etc.), biology (trawling, ER 60 4 frequency echo-sounder, scanmar sensor, etc.) and bathymetrics (EM1002 multibeam echo-sounder). It is also used as a support ship for diving missions (studying biodiversity, etc.).

Here are its main characteristics:

4.3.1.2 Cruises by L'Antea

RV Antea is a 35 m-long catamaran operating in the Atlantic and Indian Oceans. The vessel is based in France. It is operated by IRD.

It performs oceanographic missions for physics (umbilical cable, shipboard ADCP, etc.) and biology (trawling, ER 60 46-frequency echo-sounder, scanmar sensor, etc.). It is also used as a support ship for diving missions (studying biodiversity, etc.).

4.3.1.4 Cruises by RV Côtes de la Manche

This oceanographic vessel performs scientific research missions, mainly in the Atlantic Channel area. It can conduct missions lasting about ten days, at distances reaching 200 nautical miles from harbour. This inshore vessel is fitted with instruments and meets the needs of researchers in the fields of marine geosciences, physical and biological oceanography, biogeochemistry and ocean chemistry. It also contributes to long-term marine environmental observation missions and to research and trials missions in various marine technology fields. The vessel can also carry out teaching missions for graduate and post-graduate university levels.

4.3.1.6 Cruises by L'Astrolabe

L'Astrolabe is a 65 m-long "ice strengthened" supply ship serving the Dumont d'Urville base in Adélie Land. It can embark 49 passengers and several hundreds of tons of food supplies, fuel and equipment. Each year, it is used by IPEV for 120 days, regularly ensuring 5 return trips (*November to March*) over a distance of 2,700 km between Tasmania and the Antarctic continent.

L'Astrolabe is also used for coastal oceanographic surveys of short duration in the Antarctic.

Here are its main characteristics:

Ocean-going vessel

NODC code: 35AC

Call sign: FHZI

Length 65m

4.3.1.8 Cruises by L'Europe

This oceanographic research vessel is a 29.60 m-long catamaran operating in the Mediterranean Sea. The outcome of cooperation between IFREMER and ICRAM (the Italian Central institute for applied marine research), it was built in 1993 at Sables d'Olloannes (OCEA), France.

It is designed to perform a range of missions, in particular related to fisheries research and the coastal environment. It is used for conventional deep-sea trawling (reaching 1,300 meters), pelagic and experimental trawling, deploying set gear (gill nets, longlines, pots, etc.), seismic and sedimentology studies and hydrological sampling.

Here are its main characteristics:

4.3.1.9 Cruises by *Le Suroît*

Built in 1975, *Le Suroît* was upgraded in 1999. The refitting of the ship was the opportunity to totally upgrade all its scientific equipment. The performances of this equipment are consistent with refocused cruises on the continental shelf, to the bottom of the slope, limited to depths of 4,000/4,500 m.

- bathymetry
- core sampling, dredging, beam trawling
- high and very high resolution seismics
- CTD/hydrology
- towed SAR-type vehicles
- moorings, station work

Here are its main characteristics:

Ocean-going vessel

NODC code: 35LU

Call sign: FZVN

Length 56m

Crew: 16/23

Scientists and technicians:

4.3.1.10 Cruises by Marion Dufresne

RV Marion Dufresne is a multi-purpose research vessel launched in 1995, commissioned by CMA-CGM, and jointly chartered by TAAF and IPEV. It provides two main functions:

- **oceanographic research:** on every ice-free ocean, under the responsibility of IPEV - 217 days a year.
- **logistics for French sub-Antarctic islands:** Crozet, Kerguelen, Amsterdam/Saint-Paul, under the responsibility of TAAF – 120 days per year (4 x 30 days).

Here are its main characteristics:

Ocean-going vessel

NODC code: 35MF

Call sign: FNIN

Length 120.50m

4.3.1.11 *Cruises by Pourquoi pas?*

This multidisciplinary vessel is intended for the following missions:

- Offshore and inshore hydrography with deployment of hydrographic survey launches
- Exploring the water column, currents
- Underwater mapping using its sounders and sub-seabed characterization (seismics, gravimetry, magnetism)
- Multi-scale study of physical, biological or geological processes
- Surveying of sites using acoustic equipment, deployment of towed (SAR), remotely operated (Victor 6000) or autonomous (Nautilus) vehicles, positioning heavy equipment near the seabed using cable (Penfeld)
- Collecting and analyzing samples of water, living matter, sediments or rocks (coring, dredge)
- Deploying the Navy's Newtsuit assistance system to rescue submarines in difficulty.

Here are its main characteristics:

Ocean-going vessel

4.3.1.14 Cruises by *Thalia*

Thalia is a 24.50 m-long oceanographic vessel operating in the English Channel and the Bay of Biscay. It was built in Cherbourg in 1978.

It is a multi-purpose research vessel used for coastal environmental cruises and fisheries resource assessments. It is designed to perform shallow-water multibeam echo-sounder mapping, take hydrological measurements, film underwater videos, take samples using grab and dredge, as well as performing acoustic or seismic trials.

Here are its main characteristics:

4.3.1.15 Cruises aboard other vessels (not including FLEET-JSU)

This year, 2 cruises were performed aboard vessels which do not belong to the JSU fleet. They were inshore cruises using other means made available by other organizations.

BREBENT-CRUSTACÉS-JUIN2015

Small vessel Le Pépère

CARLIER Antoine

LAURANS Martial

From 25/06/15 to 27/06/15

HAWKEYE3-GDM

Sepiola (University Rennes I)

CORDIER Céline

BAJOUK Touria

From 08/09/15 to 09/09/15

4.3.2 Cruises not referenced at SISMER (teaching and station vessels)

Some cruises are not listed at SISMER. This is notably the case for:

- training cruises aboard JSU vessels,
- cruises conducted aboard station vessels.

4.3.2.1 Training cruises aboard inshore vessels

Training cruises make up a non-negligible proportion of the annual sea outings of the INSU's inshore vessels.

The following tables give the list of training cruises made aboard Téthys II and Côtes de la Manche, indicating the number of days at sea for each of the cruises:

Téthys II

Cruise	Dates	Zone	Chief scientist	Chief scientist's laboratory	Number of days
DEEM 2015	18 to 20/03/15	Ligurian Sea	MOUSSEAU Laure	LOV, Oceanology observatory in Villefranche	3
DIMAPLAN 2015	06 to 07/07/15	Ligurian Sea	MOUSSEAU Laure	LOV, Oceanology observatory in Villefranche	2
GEOMAST	20 to 24/10/15	Ligurian Sea	DESSA Jean-Xavier	UMR GeoAzur, UPMC	5
GEONICE-2015	18 to 21/02/15	Ligurian Sea	Petit Carole	Geoazur, Univ Nice	4
GRE-M1	15 to 17/03/15	Ligurian Sea	Doan Mai-Linh	UJF, ISTERRE-OSUG	3
IAO 2015	16 to 20/09/15	Ligurian Sea	MOUSSEAU Laure	LOV, Oceanology observatory in Villefranche	5
IPGP2015	13 to 16/02/15	Ligurian Sea	Cogné Jean-Pascal	Paleomagnetism team, IPGP	4
LASALLE-BEAUVAINS 2015:01	26 to 29/09/15	Ligurian Sea	BAILLEUL Julien	Geosciences Dept, Institut Polytechnique LaSalle-Beauvais	4
LILLE 1	29 to 30/04/15	Ligurian Sea	WITT César	Lecturer, University of Lille 1	2
M1-P6	01 to 04/05/15	Ligurian Sea	MIGEON Sébastien	Hazards and vulnerability team, Géoazur	4
MAGIRAA	11 to 14/03/15	Ligurian Sea	PICHAT Sylvain	Dept of Earth Sciences, Ecole normale supérieure de Lyon	4
MAST-ENS	30/09 to 03/10/15	Ligurian Sea	CHAMOT-ROOKE Nicolas	UMR 8538, CNRS	4
PHYBIO_2015	23 to 28/03/15	Gulf of Lion	WAGENER Thibaut	MIO - UM 110, University AIX-MARSEILLE - OSU Institut Pytheas	6
PHYOCE	01 to 04/04/15	St Tropez	ZAKARDJIAN Bruno	UFR Sciences & Technologies, Univ Toulon (MIO UMR7294)	4
Total					54

For RV Téthys II, 54 days were used for training cruises.

Côtes de la Manche

Cruise	Dates	Zone	Chief scientist	Chief scientist's lab	Number of days
GEOBREST	18 to 23/09/15	Iroise Sea, Bay of Brest, South Brittany	GRAINDORGE David	UMR 6538 Oceanic domains, UBO	6
TP GIRONDE	12 to 19/10/15	Gironde estuary	LUBAC Bertrand	UMR 5805 EPOC - OASU, Univ Bordeaux	8
TPINT-2015-01	22 to 31/03/15	Bay of Cherbourg, Le Becquet bay	POIZOT Emmanuel	INTECHMER, CNAM	10
TPINT-2015-02	9 to 18/11/15	Bay of Cherbourg	POIZOT Emmanuel	INTECHMER, CNAM	10
Total					34

For RV Côtes de la Manche, 34 days were used for training cruises.

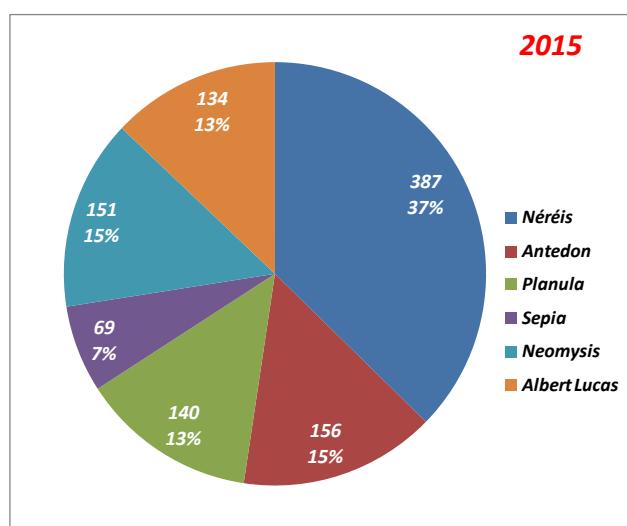

4.3.2.2 Cruises aboard station boats

The 6 station vessels go out for the day, or even for just a few hours. However, their activity is far from negligible. While awaiting the information required to reference them at SISMER, the CNFC has the following results.

The assessment of these vessels' activity (in number of days at sea, except for RV Néréïs where the number of outings were taken into account) over the past 6 years shows that the utilization of each boat can vary from one year to another. However, the total number of outings is fairly constant (1,051 outings per year on average).

	Year	2010	2011	2012	2013	2014	2015
Marine Station	Ship						
Banyuls	Néréïs	381	355	339	392	381	387
Marseille	Antedon	117	116	113	104	133	156
Arcachon	Planula	199	204	159	124	180	140
Wimereux	Sepia	115	64	65	50	76	69
Roscoff	Neomysis	180	167	165	155	149	151
Brest	Albert Lucas	128	185	160	150	166	134
Total		1120	1091	1001	975	1085	1037

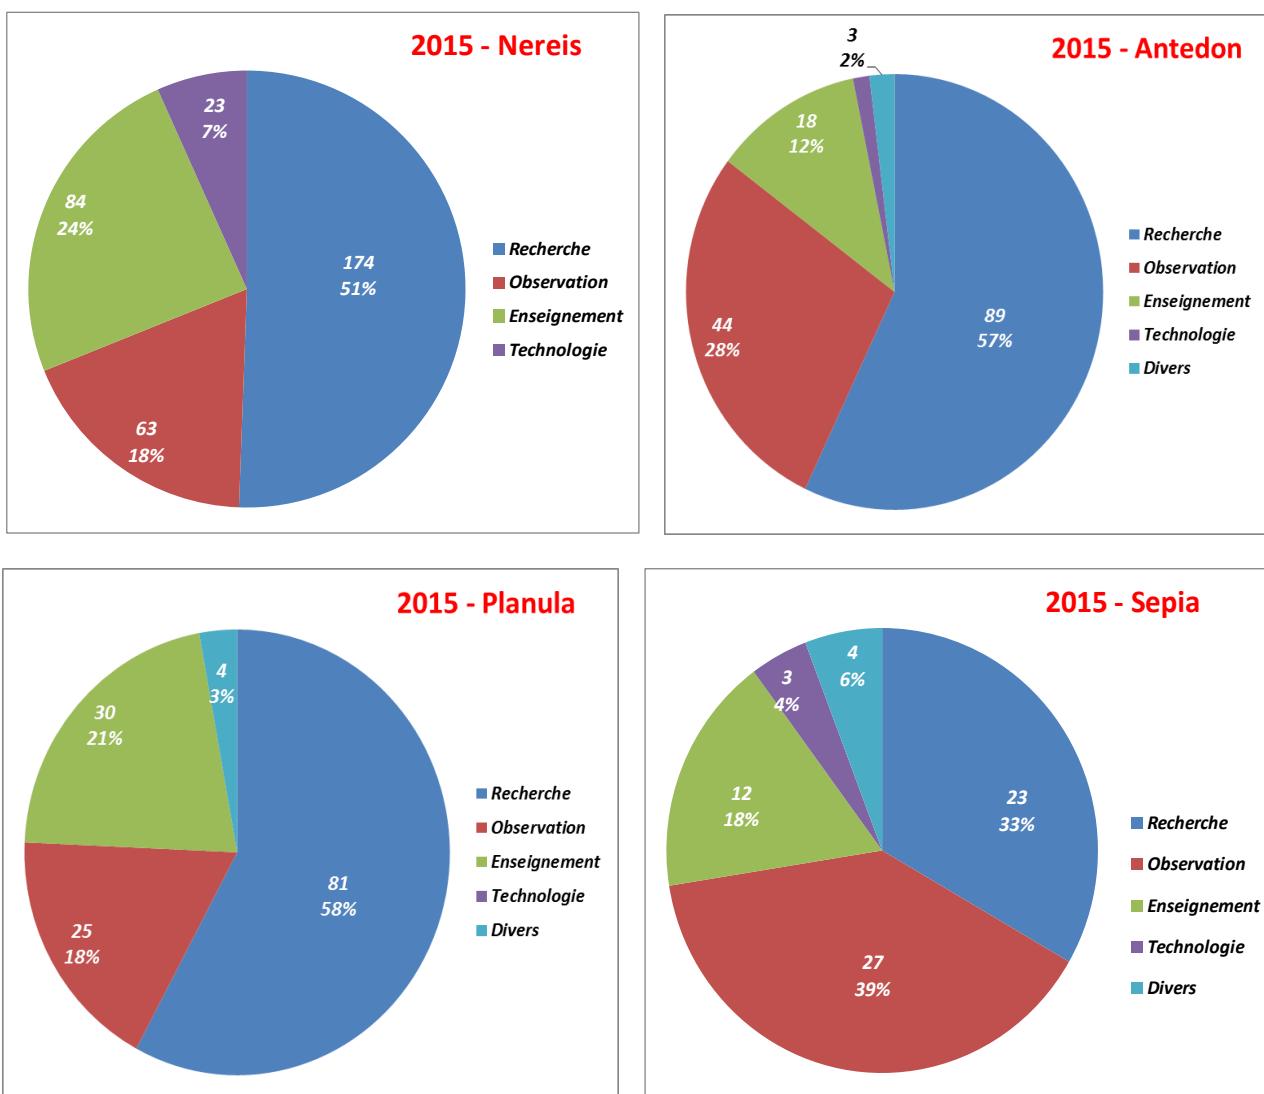

For 2015, the activity of station boats can be broken down as follows:

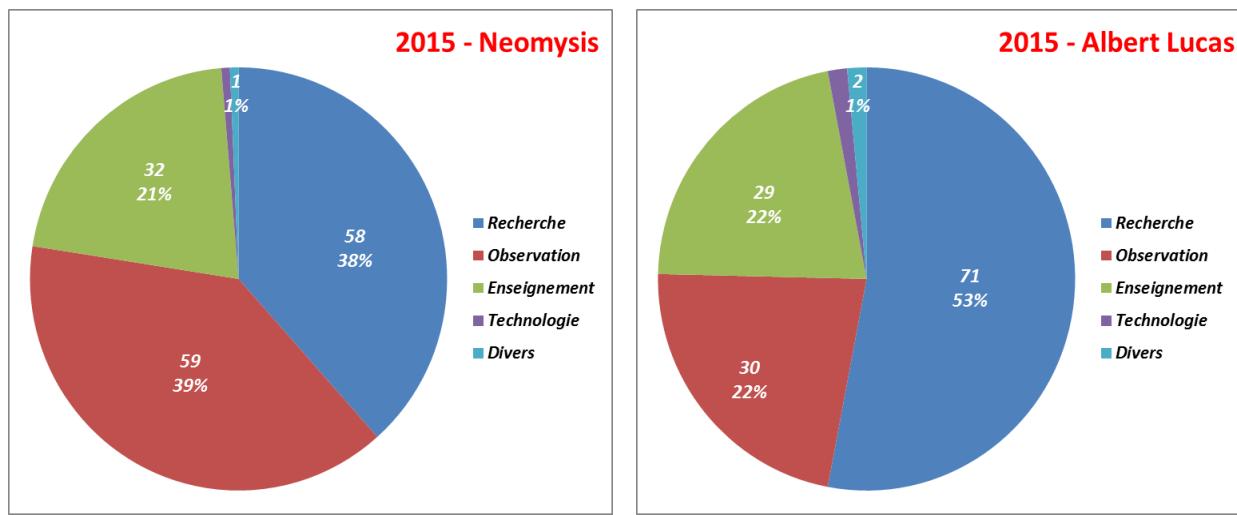

The table below shows the distribution of days at sea by vessel and by field of activity for the year 2015. For RV Néréïs, this is given in the number of outings at sea (and not the number of days).

2015	Year	Research	Observation	Teaching	Technology	Other	Total
Marine Station	Ship						
Banyuls	Néréïs	174	63	84	23	43	387
Marseille	Antedon	89	44	18	2	3	156
Arcachon	Planula	81	25	30		4	140
Wimereux	Sepia	23	27	12	3	4	69
Roscoff	Neomysis	58	59	32	1	1	151
Brest	Albert Lucas	71	30	29	2	2	134
	Total	496	248	205	31	57	1037

The following graphs show the distribution of days at sea by vessel (or outings for RV Néréïs) broken down by field of activity. The great majority by far of sea outings is devoted to research and marine observations.

4.4 LIST OF CRUISES

The alphabetical list of cruises performed in 2015 is given below.

Information about each of the cruises is available on the cruise catalogue site <http://www.ifremer.fr/sismerData/jsp/campagnesALaMer.jsp> by clicking [CTRL + left CLICK] on the name of the cruise.

Cruise	Vessel	Start date	End date	Geographical area	Name of chief scientist	Chief scientist's laboratory
<u>ABRACOS</u>	<i>Antea</i>	29 09 2015	21 10 2015	SW Atlantic (20 W boundary)	BERTRAND Arnaud	IRD SETE CENTER, IRD

6 Acronyms

ADCP	Acoustic Doppler Current Profiler
BHO	Hydrographic and oceanographic ship
BSH/DOD	Federal maritime and hydrographic agency of Germany / German oceanographic data center
CEA	Atomic Energy Commission
CNEXO	National center for ocean exploitation
CNFC	National coastal fleet commission
CNFH	National ocean-going fleet commission
CNRS	National center for scientific research
CODIR	Steering committee
COSS	Strategic and scientific orientation council
CSR	Cruise Summary Report (formerly called ROSCOP)
CTD	Conductivity Temperature Depth
DEM	Digital Elevation Model
DMON	Division of seagoing facilities and operations
DOI	Digital Object Identifier
GENAVIR	Research-vessel management (IFREMER group)
ICES	International Council for the Exploration of the Sea
ICRAM	Italian Central institute for applied marine research
IDM	IT and Marine Data Department
IEO	Spanish oceanography institute
IFREMER	French research institute for exploitation of the sea (formerly ISTPM-CNEXO)
IFRTP	French polar research and technology institute
IMN	Marine and digital infrastructure department
INSU	National institute for sciences of the universe
IOC	Intergovernmental Oceanographic Commission
IODE	International Oceanographic Data and Information Exchange
IPEV	Paul Emile Victor French polar institute
IRD	French research institute for cooperative development (formerly ORSTOM)
ISI	Information systems engineering
ISTPM	Scientific and technical institute for marine fisheries
JSU	Joint service unit
MNHN	National museum of natural history
OFEG	Ocean Facilities Exchange Group
ROV	Remote Operated Vehicle
RV	Research vessel
SAR	Towed acoustic system
SHOM	French navy hydrographic and oceanographic service
SISMER	Marine scientific information systems
TAAF	French Southern and Antarctic lands
TGIR	Very large Research Infrastructure
UNESCO	United Nations Educational, Scientific and Cultural Organization
XBT	Expendable BathyThermograph
