Figure S1 - Genetic diversity and differentiation of populations of *Fucus ceranoides* within W, NW and N sectors.

(a) Haplotype diversity (H_{hap}) at population (box-plots) and sector (stars) levels. **(b)** Nei's gene diversity (H_E) at population (box-plots) and sector (stars) levels. **(c)** Box-plot of pairwise differentiation of populations (D_{est}) within regions. Box-plots depict the median (horizontal line) and the 25th and 75th percentiles (bottom and top of the box).
