

**S5 Table. Environmental impacts of the construction of 1 m<sup>2</sup>y of buildings and of the production of all equipment needed at farm level.**

	Climate change (kg CO <sub>2</sub> -eq)	Eutrophication (kg PO <sub>4</sub> -eq)	Acidification (kg SO <sub>2</sub> -eq)
Construction of 1000 m <sup>2</sup> y of facilities	9,586.57	13.79	37.29
Production of total equipment used	27,300.7	59.57	146.95
