

S3 Table: The modern and museum specimens used for comparison. A size filter has been applied to the modern samples to select those within the same length and width range as the museum samples. “New” denotes samples from 2012 and “Old” denotes museum samples.

Sample	Species	Average thickness (µm)	Thickness standard deviation (µm)	Shell surface area (mm ²)	Weight (mg)	Volume of shell CaCO ₃ (mm ³)	Shell density (mg mm ⁻³)	Shell length (mm)	Shell width (mm)
