8    **Table S2.** Akaike information criterion (AIC) values and number of parameters (Nparam) for  
 9    models with and without spatio-temporal interaction parameter. \* represents the lowest AIC  
 10   value. / denotes models with convergence failure. For those models which have a lower AIC  
 11   with the interaction parameter, Local Index of Collocation (LIC) and significance of the  
 12   overlap between models with and without interactions (obtained with 5000 random  
 13   permutations) were added.

	Model	AIC with interactions	Nparam with interactions	AIC without interactions	Nparam without interactions	LIC	significance
