

Table s1. Morphological comparisons between female guppies reared for several months with exposure to varying levels of male harassment (n = 8 per treatment).

Variable	low harassment	high harassment	F	p
wet mass (g)	0.502±0.0812	0.492±0.106	0.085	0.772
standard length (mm)	29.384±1.132	29.405±1.791	0.002	0.967
body depth (mm)	7.525±0.686	7.380±0.775	0.780	0.383
peduncle depth (mm)	4.911±0.266	4.908±0.323	0.005	0.945
caudal length (mm)	8.435±0.664	8.239±0.604	1.170	0.287
caudal height (mm)	6.394±0.710	6.452±0.755	0.287	0.595
caudal surface area (mm ²)	50.292±6.999	50.531±6.997	0.009	0.924
caudal aspect ratio	0.801±0.110	0.827±0.110	0.557	0.460
eye diameter (mm)	2.135±0.135	2.115±0.162	0.272	0.605
