

S4 Table. Genetic (first value; \pm S.E.) and phenotypic (second value) correlations of selected traits at market size.

	RBH₃	RBW₃	% hl-Carss	% Fill
FC₃	0.97 \pm 0.01; 0.89	0.94 \pm 0.01; 0.75	X	X
% Fat₃	X	X	0.32 \pm 0.13, 0.26	0.37 \pm 0.13, 0.34

Left hand side: FC₃ = Fulton's condition factor, % Fat₃ = muscle fat percent.

Upper heading: RBH₃ = relative body height, RBW₃ = relative body width, % hl-Carss – headless-carcass yield, % Fill = fillet yield.
