Supplementary table 5: Annotation of *Vibrio* sp. F12 specific regions.

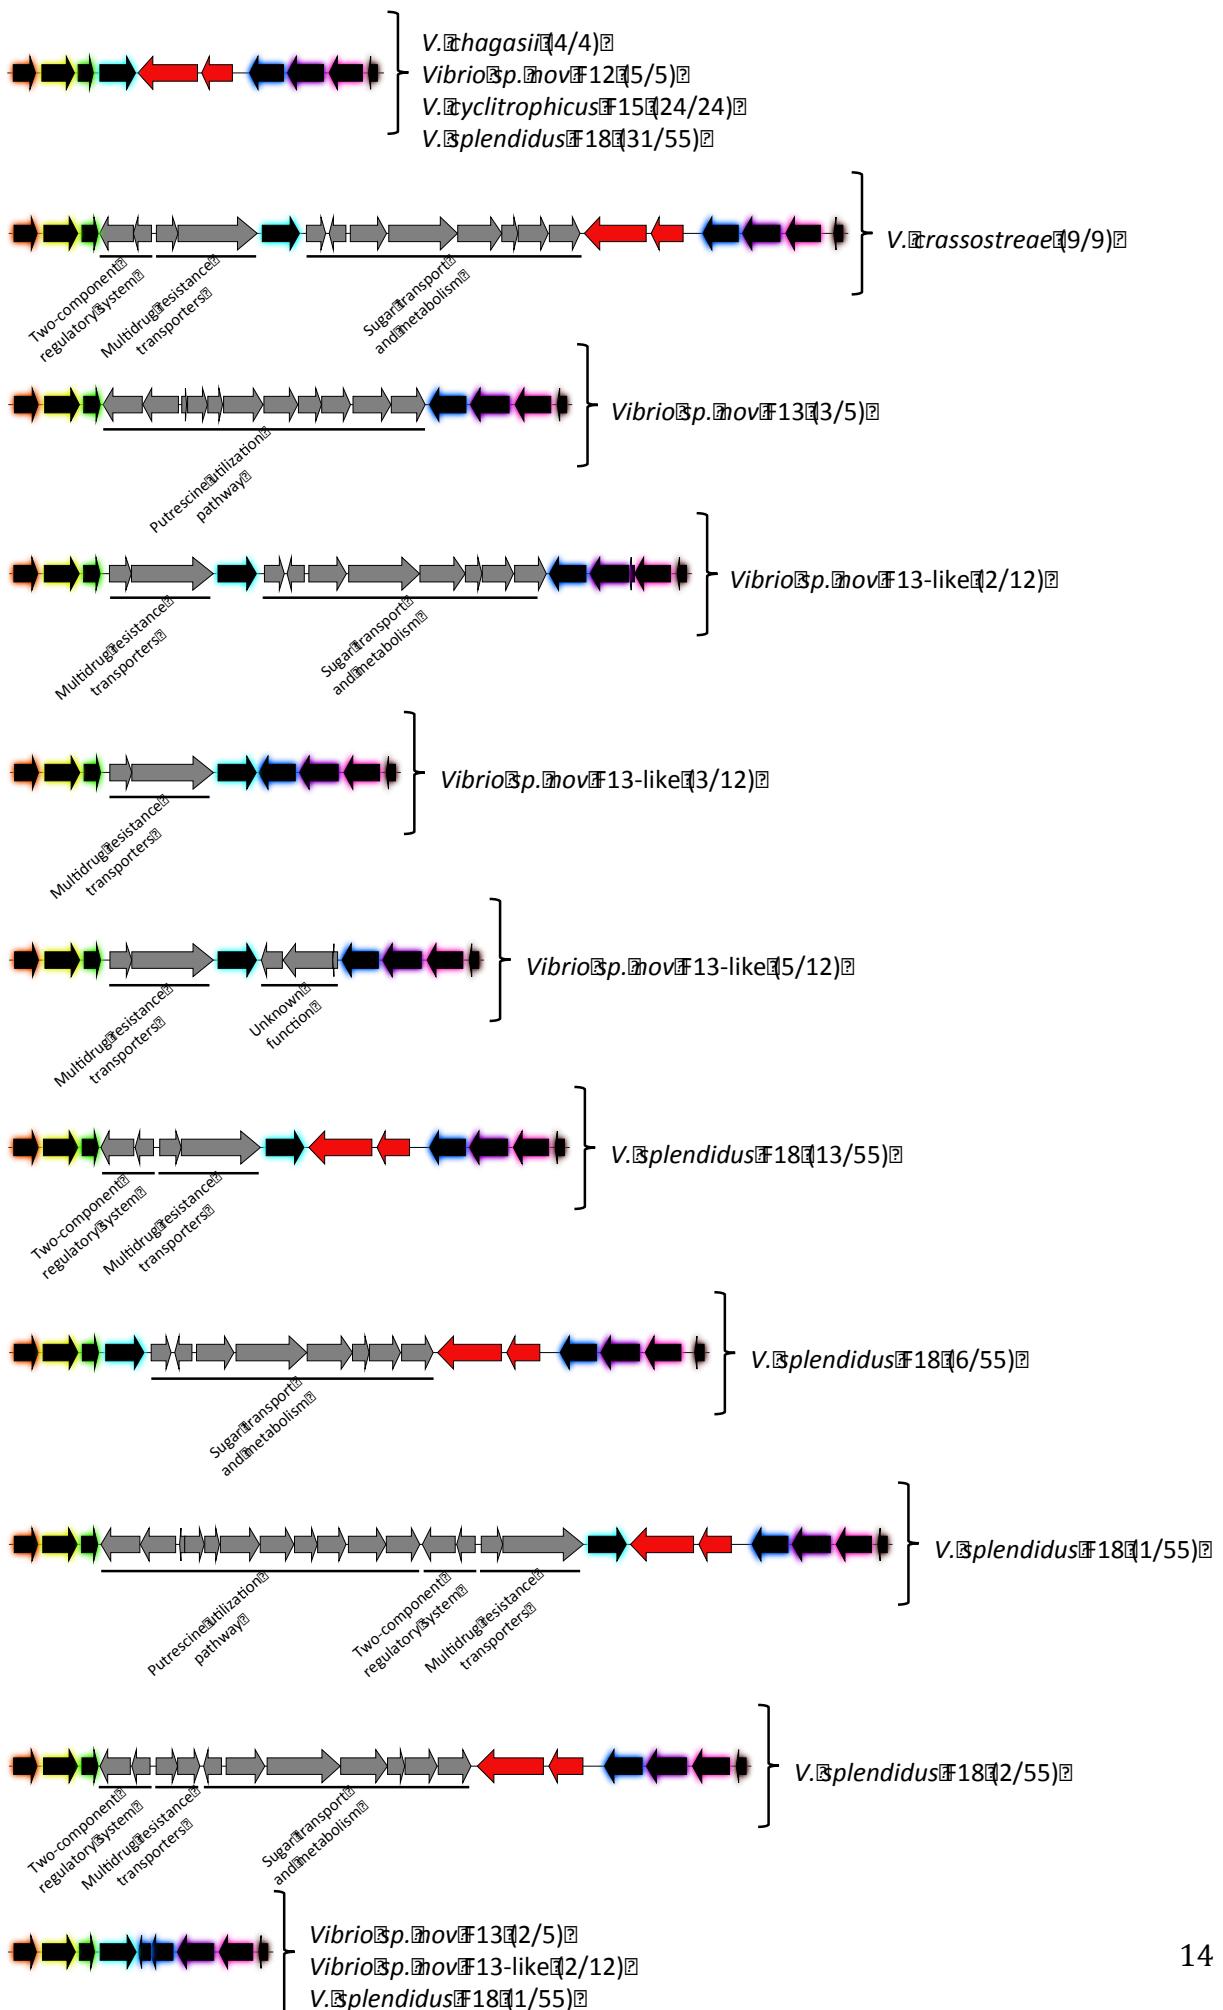

Region	Locus tag ^a	Product
R-a	160071	AraC-type DNA-binding domain-containing protein
	160070	Putative MOSC domain protein
R-b	180051	Iron-hydroxamate transporter permease subunit
	180052	Ferrichrome-binding protein
	180053	Ferrichrome outer membrane transporter
	180055	Transcriptional activator
	180056	Conserved protein of unknown function with ferric iron reductase domains
	180057	Iron-hydroxamate transporter subunit ; ATP-binding component of ABC superfamily
R-c	10026	Putative Transcription regulator, AsnC-type protein
	10027	Conserved membrane protein of unknown function
R-d	10384	Putative Transcription regulator, TetR-like
	10385	Putative dihydrofolate reductase
	10386	Proton/sodium-glutamate symport protein
R-e	40063	NADH:flavorubredoxin oxidoreductase
	40065	Flavorubredoxin oxidoreductase
R-f	40179	Transcriptional regulator, LysR family protein
	40180	Conserved exported protein of unknown function
R-g	40197	Conserved exported protein of unknown function (R5.7)
	40198	Conserved exported protein of unknown function (R5.8)
R-h	40249	Conserved membrane protein of unknown function
	40250	Uncharacterized HTH-type transcriptional regulator
	40251	Putative glutathione S-transferase
	40252	Putative transcriptional regulator, LysR family protein
	40253	Putative methyl-accepting chemotaxis protein
	40254	Cryptochrome-like protein cry2
	40255	Sigma-54 dependent transcriptional regulator
	40256	Aldehyde dehydrogenase B
	40257	Putative NUDIX hydrolase
	40258	Conserved protein of unknown function
	40259	Putative multidrug efflux transporter
	40260	S-formylglutathione hydrolase
	40261	Alcohol dehydrogenase class 3 (Alcohol dehydrogenase class III)
	40262	Quaternary ammonium compound-resistance protein QacE
R-i	200002	Murein peptide amidase A
	200003	Periplasmic oligopeptide-binding protein
	200004	Putative Ethylbenzene dehydrogenase
	200006	Putative cytochrome c-type protein NrfB
	200007	Putative tetraheme cytochrome c3
	200027	Putative Organic hydroperoxide resistance protein
	200028	Putative Organic hydroperoxide resistance transcriptional regulator
R-j	200054	Putative two component histidine kinase

	200055	Two-component response regulator of C4-dicarboxylate transport
	200056	Putative glycerophosphoryl diester phosphodiesterase
	200057	Putative Phosphonate-binding periplasmic transporter
	200058	Putative Phosphonates import ATP-binding protein PhnC
	200059	Putative PhnE phosphonate ABC transporter, permease
	200060	Putative Phosphonate ABC transporter permease protein phnE1
R-k	310012	Conserved protein of unknown function
	310011	Conserved exported protein of unknown function
R-l	130064	Putative 5'-nucleotidase
	130062	Multiple antibiotic resistance protein marc
R-m	100119	Putative membrane bound peptidase; NefD homolog
	100118	Putative Stomatin like transmembrane protein
R-n	100095	Conserved exported protein of unknown function
	100094	Conserved protein of unknown function
R-o	30035	Putative Signal transduction protein containing an EAL and a GGDEF domains
	30034	Putative ABC-type sugar transport system, periplasmic component
	30033	Putative Ribose ABC transporter, periplasmic ribose-binding protein
R-p	170092	Conserved exported protein of unknown function
	170091	Conserved exported protein of unknown function
	170090	Conserved protein of unknown function
	170089	Conserved exported protein of unknown function
	170088	Conserved exported protein of unknown function
	170087	Putative Transcriptional regulator, LuxR family
	170081	Endonuclease/Exonuclease/phosphatase family protein
R-q	80118	GGDEF family protein
	80117	Putative Outer membrane protein and related peptidoglycan-associated (lipo)proteins
	80116	Conserved protein of unknown function
	80115	Conserved protein of unknown function
	80114	TadE-like protein
	80113	Conserved exported protein of unknown function
	80112	Conserved membrane protein of unknown function
	80111	Putative Flp pilus assembly protein TadB
	80109	Putative Flp pilus assembly ATPase TadZ/CpaE
	80108	Conserved exported protein of unknown function
	80106	Putative Flp pilus assembly protein RcpC/CpaB
	80105	Conserved membrane protein of unknown function
	80104	Putative pilin Flp
	80103	Bacterial regulatory helix-turn-helix , lysR family protein
R-r	80026	Conserved exported protein of unknown function
	80025	Conserved exported protein of unknown function
	80024	Conserved protein of unknown function
	80023	Conserved exported protein of unknown function
R-s	80012	Fe2+/Zn2+ uptake regulation protein

	80011	Adenine deaminase family protein
	80010	Putative carbonate dehydratase
	80009	Putative Cobalamin (vitamin B12) biosynthesis CobW-like
R-t	250021	Transcriptional regulator
	250022	Conserved membrane protein of unknown function
R-u	60205	Conserved exported protein of unknown function
	60204	Conserved protein of unknown function
R-v	60093	Putative Cytochrome c556
	60092	Hydrogenase cytochrome B-type subunit-like protein
	60091	Transcriptional regulator, MarR family protein
R-w	60041	Transcriptional regulator
	60040	Conserved exported protein of unknown function
R-x	350020	Predicted Na+/dicarboxylate symporter
	440001	Coenzyme A disulfide reductase
	440002	Conserved exported protein of unknown function

^aLocus tag in B8 (VB12B8_v1_XXXXXX)

Supplementary Figure 1: Comparison of the genetic organization of the R5-7/8 locus in the Splendidus clade. The first genetic organization (top of the figure) is mostly found in the populations of the Splendidus clade and was used as a reference for Figure 3. The R5.7 and R5.8 genes are represented with red arrows. The surrounding genes of R5-7/8 are represented by black arrows shrouded by colors to keep track in the different genetic organization shown in this figure. Genes in grey are intermittently present in the R5-7 locus and encode for different metabolic activities that are indicated when known. The distribution among different species the Splendidus clade of the different genetic organization of the R5-7/8 locus is shown on the right.

Supplementary Figure 2: Virulence of R5.7 inactivated strains belonging to the Splendidus clade. Comparison of mortalities induced by wild type strain (wt) and R5.7 inactivated mutant of a strain representative of *V. chagasi* (8T2_11) and *V. splendidus* (7T7_2) isolated in France (population #3 and 24 in Bruto et al., 2016) and *V. splendidus* isolated in Plum Island (population F18 in Hunt et al., 2008). All infections were performed in duplicate and at least twice by intramuscular injection of strains (10^7 cfu/animal) in 20 oysters and counting the percentage of mortalities at 24H (y-axis).
