

Supplementary Figure 4: E-Shrubland

Endmember assemblage scores and selected pollen taxa for E-Shrubland (filled curves) against age in ka. On top interglacial peaks of marine isotope stages (MIS) of the Brunhes Chron are indicated. Stable oxygen isotopes of benthic foraminifers of Core MD96-2048 (violet line) and of global stack LR04 (black line, Lisiecki & Raymo 2005).
