

References cited within the assessed data-set presented within Small et al. "Devising quality assurance procedures for assessment of legacy geochronological data relating to deglaciation of the last British-Irish Ice Sheet"

NB: All care has been taken to make sure this reference list is complete and without error. However, in dealing with a data-set of this size omissions and errors are always possible. If found we apologise and would be grateful if any errors could be pointed out to us so that we can rectify. Additionally we would encourage any users of our assessed data-set to consult the original publications for additional information. Where possible we have referenced to earliest publication of dates.
