

Goetze, J.S., Januchowski-Hartley, F.A., Claudet, J., Langlois, T.J., Wilson, S.K., Jupiter, S.D. 2017. Fish wariness assessed by diver operated stereo-video is a more sensitive indicator to changes in fishing pressure than abundance, length or biomass. *Ecological Applications*

---

## Supplement

Information on samples size and the parameters for each linear model.

## File list in DataS1.zip

Appendix S1\_Regression Parameters 17-11-2016.xlsx

## Description

The file contains information on sample sizes ( $n$ ) and the parameters; intercept, slope, standard error of the slope, degrees of freedom,  $R$  squared and  $P$  values for all linear models within the manuscript.
