

Supplement

Figure A1:

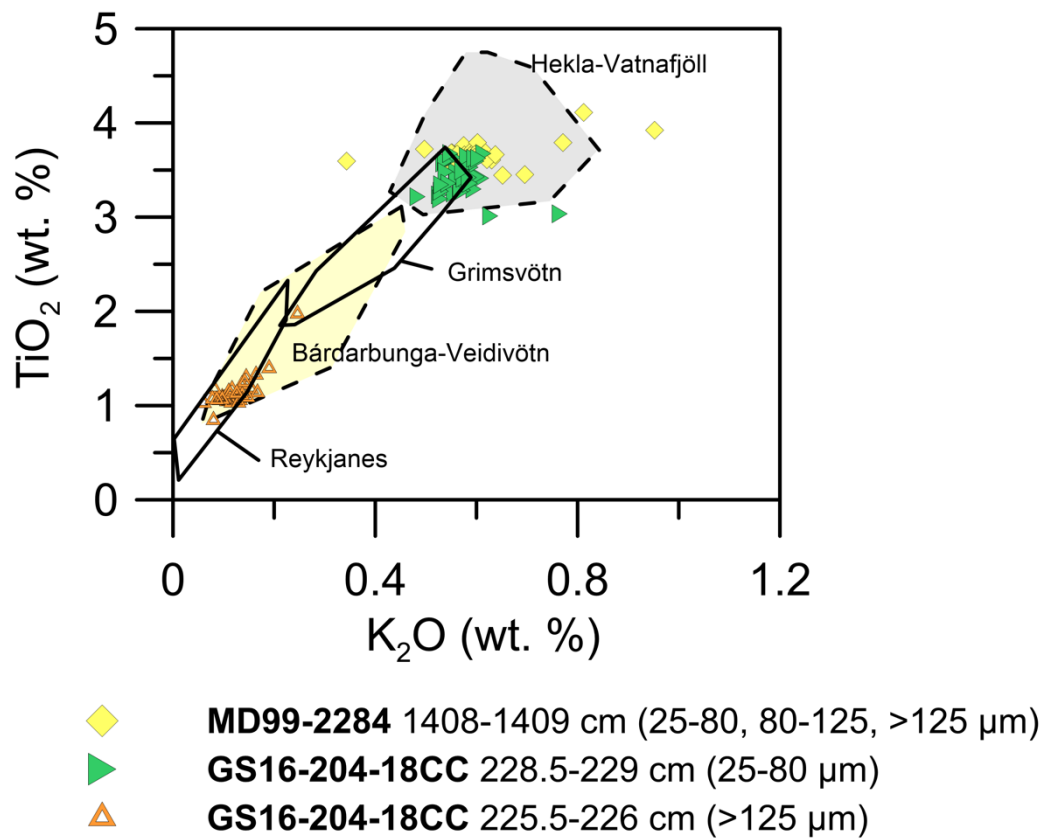

Figure A1: Geochemical data from the FMAZ II-1 horizon in GS16-204-18CC and MD99-2284 and the GS16-204-18CC (225.5-226 cm) horizon compared to the geochemical envelopes of Hekla-Vatnafjöll (Jakobsson, 1979), Grimsvötn (Jakobsson, 1979, Óladóttir et al., 2008), Bárðarbunga-Veidivötn (Jakobsson, 1979, Óladóttir et al., 2008) and Reykjanes volcanic systems (Jakobsson et al., 1978).

Figure A2:

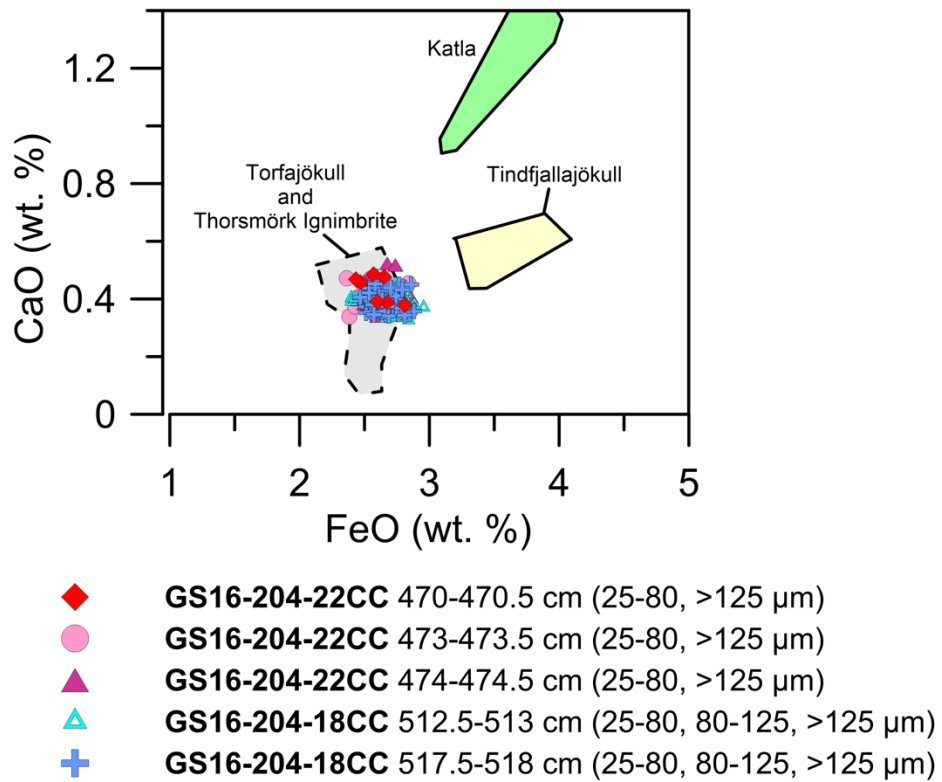

Figure A2: Geochemical data from the NAAZ II (II-RHY-1) horizons in GS16-204-18CC and GS16-204-22CC compared with the geochemical envelopes of Torfajökull (Moles et al., 2019) Tindfjallajökull (Moles et al., 2019) and Katla (Lacasse et al., 2007).

Figure A3:

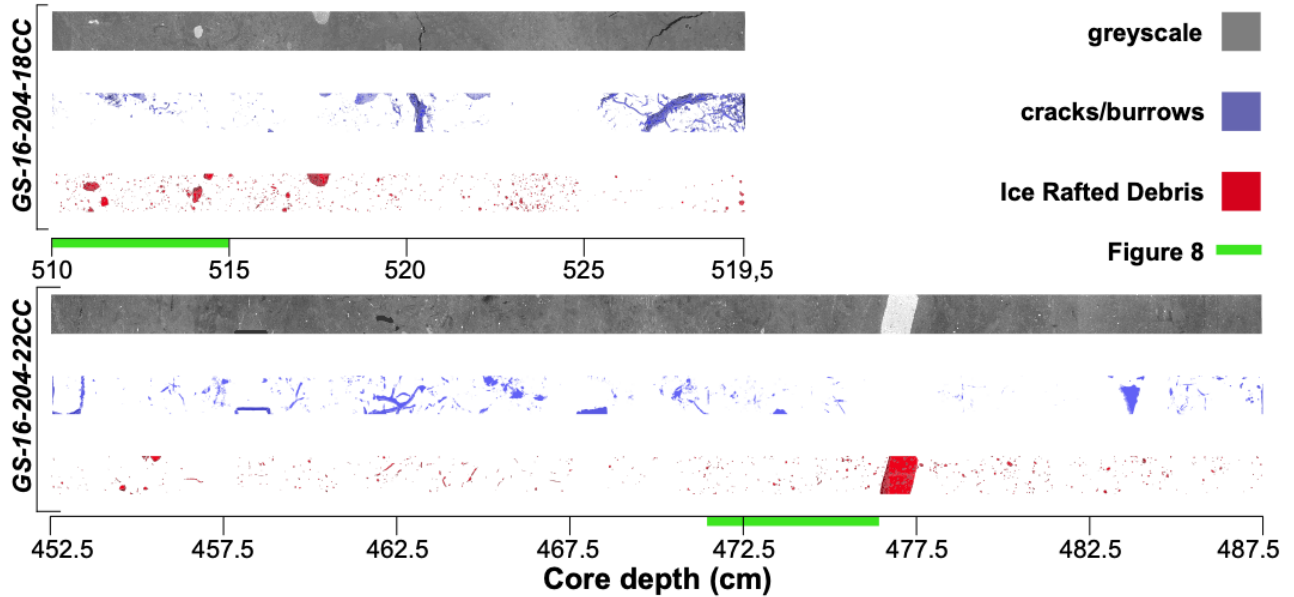

Figure A3: Overview of the complete CT-scanned sections of GS16-204-18CC and GS16-204-22CC. Grayscale image shows a single slice of the scan with all the components. Red is the extracted IRD and blue is the extracted cracks/burrows, both volume rendered prior.
