

S6 Table. Bacterial strains resistant to antibiotics

Spot n°	Species	Reference	Noticeable resistances
22	<i>Enterococcus gallinarum</i>	N489	vancomycin
27	<i>Enterococcus faecalis</i>	CIP 104 676	aminoglycosides, chloramphenicol, vancomycin
28	<i>Enterococcus gallinarum</i>	CIP 105 985	vancomycin
30	<i>Enterococcus faecium</i>	N507	amoxicillin, aminoglycosides, erythromycin, lincomycin, cotrimoxazole
32	<i>Enterococcus faecium</i>	N490	amoxicillin, vancomycin
33	<i>Enterococcus faecalis</i>	N491	vancomycin
34	<i>Enterococcus gallinarum</i>	N492	vancomycin
37	<i>Enterococcus faecium</i>	CIP 107.387	amoxicillin, vancomycin, teicoplanin
38	<i>Enterococcus faecium</i>	N733	amoxicillin, vancomycin, teicoplanin
40	<i>Enterococcus faecium</i>	N823	amoxicillin, vancomycin, teicoplanin
43	<i>Staphylococcus aureus</i>	CRBIP 21.21	methicillin, tetracyclin, aminoglycosides, macrolides, lincosamides, streptogramin B, sulfonamides, ciprofloxacin, rifampicin, fosfomycin
