Otolith parameters: OL, length, OH- width, OW- weight, OSL- sulcus length, OOs- ostium length, OCu- caudal length, OA- area, OP- perimeter; lengths in mm, weight in g, area in mm².

Table S2. Relationship between TL and each otolith descriptor was showed according to the significance of side effect, OL, otolith length; OH, otolith width; SU, sulcus; OS, ostium; OA, otolith area; OP, otolith perimeter, FF, form factor; AR, aspect ratio; C, compactness; RE, rectangularity, RO, roundness; EL, ellipticity; CI, circularity y; SQ, squareness.

Otolith descriptor	Relationship between TL and otolith descriptor	R ²
OL	Left side TL = 0.719+ 0.065OL	R ² = 0.665
