

**Table S1. Descriptive details of sampled *Podarcis muralis* populations.**

<b>Name</b>	<b>Latitude Longitude</b>	<b>Altitude (m ASL)</b>	<b>Habitat Type</b>	<b><i>N</i> Low-elevation <i>N</i> High-elevation</b>	<b>Sampling Dates</b>
<b>Alas<sup>1</sup></b>	42°56'58"N 001°2'47"E	472	Cemetery and rock wall	5	10 Apr. 2018
				5	17 Apr. 2018
<b>Luzenac<sup>1,2</sup></b>	42°57'22"N 001°5'1"E	443	Cemetery and rock wall	4	3-4 Apr. 2018
				5	17 Apr. 2018
<b>Mercenac</b>	42°57'52"N 001°6'10"E	382	Cemetery	5	21 Apr. 2018
				6	18 Apr. 2018
<b>La Mongie</b>	42°54'32"N 0°10'7" E	1795	Natural rock outcrops and rock walls	0	-
				8	1-6 May 2018
<b>Col de la Core</b>	42°51'34.4"N 1°6'18.2"E	1402	Natural rock outcrop	0	-
				9	26 May 2018

<sup>1</sup>Population also studied in Calsbeek *et al.* (2010) *J Evol Biol* 23:1138-47.

<sup>2</sup>Population also studied in Gangloff *et al.* (2019) *Physiol Biochem Zool* 92:189–200.
