Table of content

Figures S1 to S3

FigureS1: Standardize Southern Oscillation Index over 2013-2017 from April 2013 to December 2016. The SOI is defined as the sea level pressure difference between Tahiti and Darwin (Australia).

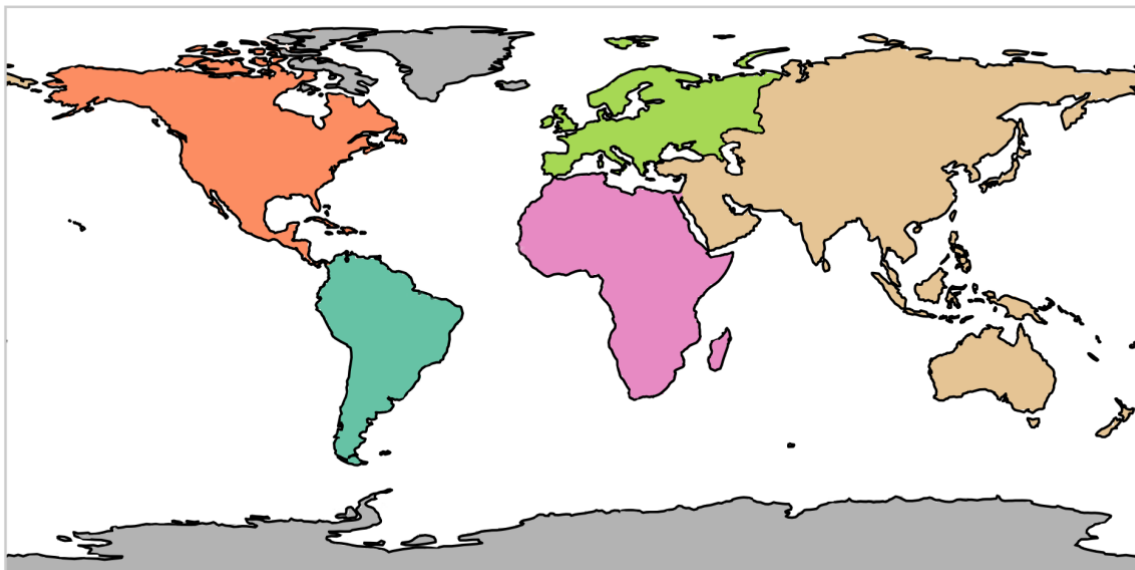

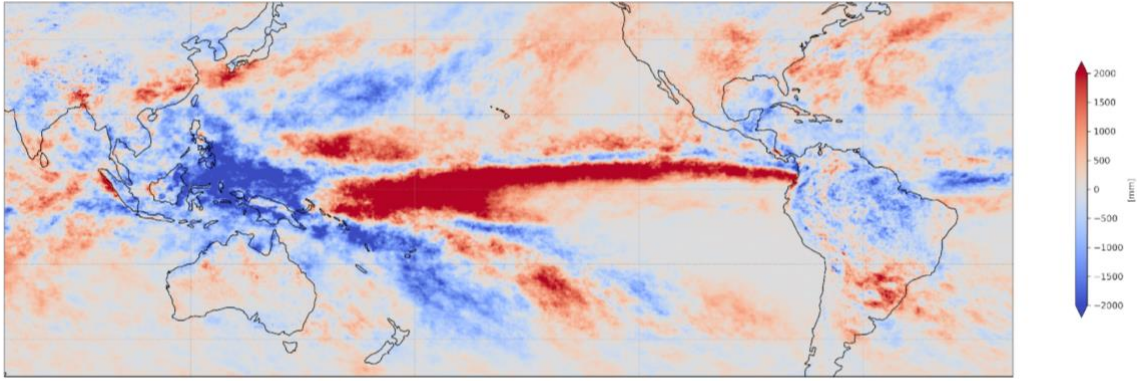

Figure S2: Continent masks used to estimate TWS changes from GRACE data over 2014-2016.

TRMM precipitation data. Difference between precipitation from [June 2014 to May 2016] and [June 2012 to May 2014].

figure S3: Map of rain accumulation differences between 2014-2016 and 2012-2014 based on the Tropical Rain Measurements Mission (TRMM) data. Values are in mm.
