

SUPPLEMENTARY MATERIAL

BYCATCH COMPOSITION

Table SI. Bycatch composition for beach seining (BS) and bottom trawling (BT) (Nunes & Rosa 1998) in municipality of Lucena, state of Paraíba, northeast Brazil. TAXA: order, family, and species, classification based on Nelson et al. (2016). (* data previously published by Passarone et al. (2019); sp. specimens identified at family level; sp.1, sp.2 (... new species in process of description by other authors); N: number of individuals; N (%): percentage of individuals; IUCN: Level of species extinction risk according to the categories proposed by IUCN and assessed by ICMBio [data deficient (DD), least concern (LC), near threatened (NT), not assessed (NA)]; FMFG: feeding mode functional group classification, by Elliott et al. (2007) [detritivore (DV), herbivore (HV), omnivore (OV), piscivore (PV), zoobenthivore (ZB), zooplanktivore (ZP)]; EUFG: estuary use functional group classification, by Elliott et al. (2007) [marine migrant (MM), marine straggler (MS), estuarine (ES)]; REF.: references (x information not available in the literature).
